# Environmental Policy

Macnaught Pty Ltd, a privately owned company established in 1948, has been designing and manufacturing premium quality fluid measurement, fluid transfer and lubrication equipment for the agricultural, automotive, industrial, mining and transport industries across the globe for over seven decades.

In the course of designing and development, order taking, procurement, manufacturing, and distribution of fluid management equipment to the global market, Macnaught is committed to the protection of the environment.

We will achieve this through:

- Energy and production efficiency practices;
- Waste minimisation and recycling practices;
- Pollution prevention;
- Responsible management of our local environment and surrounding ecosystems;
- Pursuing practical and cost effective initiatives to minimise environmental impacts, and
- Use our Environmental Management System (EMS) as a tool in minimising our environmental impacts which includes setting and reviewing environmental objectives and targets.

Macnaught actively engages and encourages employee buy-in for the on-going support and operation of our ISO14001:2015 certified EMS. We demonstrate our commitment to continual improvement of the EMS in order to enhance processes and improve our environmental performance to minimise our impact on the environment through the use of measureable and achievable objectives and targets whilst observing and complying with applicable environmental legislation and obligations. Our commitment includes the education and training of employees enabling them to work and achieve the established objectives.
